Profile Summary

- ✓ Creative thinker with strong analytic skills to investigate and resolve problems, Diligent with an open and clever mindset, like to share ideas and experience with people whenever need. Self-motivated and goal oriented, Ability to **work independently and in multi-task team environment**, Best with numbers and Fast Learner. Dynamic & versatile professional having **4 years Of IT industry experience** developing and managing systems and stakeholders throughout the projects. Willing to involve in Robust Application Development in Banking Domain.

Area of Expertise

With expertise in full-stack .NET application development and Cloud technologies, I have strong experience across various domains, including Banking, Insurance Service, IoT, Healthcare, and CRM. My skills cover end-to-end development, from designing user interfaces to building robust back-end solutions, and deploying scalable cloud-based applications

Education

Anna University, Chennai, India.

B.E., Electronics and Communication Engineering

- ✓ First Grade – **80%**

2018-2022

GHSS, Madurai, India.

HSC

- ✓ First Grade – **87%**

2016-2018

GHSS, Madurai, India.

SSLC

- ✓ First Grade – **97%**

2015-2016

Technologies Familiarity & Expertise

- ✓ **FrontEnd:** HTML, CSS, Javascript, jQuery, Bootstrap, AJAX, Kendo UI, Typescript, Razor
- ✓ **JavaScript Libraries:** Angular JS, Angular 14, Node Js, React
- ✓ **BackEnd:** ASP.NET Core MVC, ASP.NET MVC, C#, LINQ, ASP.NET Web API, Rest API
- ✓ **Desktop Application Development:** Windows Form, WPF, WCF
- ✓ **Database:** Microsoft SQL Server, PostgreSQL, Stored Procedures, Triggers, Index
- ✓ **Code Principles:** OOPS, SOLID, Clean Architecture, N-Tier Architecture, Repository Pattern
- ✓ **Tools:** Visual Studio, Visual Studio Code, SSMS, Postman, Git Fork, Git Lab, TFS, Azure DevOps, Jira
- ✓ **Data Access Technology:** ADO.NET, EntityFrameworkCore, Dapper
- ✓ **Cloud Technologies:** Azure, Kubernetes, CI/CD, Google Cloud, Jenkins
- ✓ **Others:** C Programming, Python, IIS, Docker, Redis DB, Kafka, Agile, BitBucket

Work Experience

Software Developer

May 2025 – Till

Ascendion Engineering. SDN BHD
(Penang, Malaysia)

Client: Intel

- ✓ Involved in Intel FSCO project and Participated with Fellow team mates to troubleshoot Customer's Ticket
- ✓ Follow One MPS Architecture to Understand the Business Needs
- ✓ Write Clean Code to Maintain the Structure and Improve the Readability
- ✓

Software Engineer

August 2024 – May 2025

Gnrgy IN LLP, Bangalore, India.
(Banking)

Client: Vega (Israel)

- ✓ Participated in the entire software development lifecycle for an insurance domain project using .NET, from requirements gathering to deployment.
- ✓ Implemented seamless integration with third-party systems, ensuring smooth data exchange between various insurance platforms.
- ✓ Identify and resolve performance bottlenecks in both front-end and back-end components to enhance overall application efficiency.
- ✓ Led the development of an insurance platform using .NET technologies, including full lifecycle participation from system integration to cloud deployment, supporting over 500,000 policyholders.

Associate Member of Technical Staff

July 2023 – August 2024

GEOGO Tech Solutions Private Ltd., Bangalore, India.
(U.S.A)(Finance & Insurance Domain)

Client: AbeTech

- ✓ Engaged in the entire life cycle of software development: requirement gathering, architectural and functional design, development, testing, document management, obtaining user and management sign-off, delivering, and handing over the final product.
- ✓ Developed the backend with the code first approach with Entity Framework Core and for db used Microsoft SQL Server. Also worked with the Integration of the application with arduino.
- ✓ Addressing Client-side Bugs and Deploying the Application on IIS Server.
- ✓ Conducting Customer Demo Presentations and Interacting with Clients.
- ✓ Responsible for Assigning Tasks to Junior Developers while seeing through its Completion.
- ✓ Tracked Application development through scrum tools for issue tracking and version control with Gitlab

Junior Software Engineer

January 2021-June2023

MediaWave Technologies., India.
domain)

Client: Certify Global (USA)(CRM & IOT

- ✓ Developed and maintained banking application features, ensuring high performance and scalability using .NET Core.
- ✓ Integrated third-party banking APIs and internal financial systems for real-time data synchronization and transaction processing.
- ✓ Conducted regular code reviews to ensure best practices, maintain code quality, and adhere to banking industry standards.
- ✓ Improved application efficiency by optimizing critical sections of code, reducing response times and system resource usage.
- ✓ Managed the deployment of the banking application on cloud platforms, ensuring seamless updates

and minimal downtime.

- ✓ Ensured secure handling of sensitive banking data, following industry standards like PCI-DSS and GDPR for compliance.
- ✓ Built secure web-based banking applications using ASP.NET and Web API to support critical business functions, including account management, fund transfers, and customer onboarding.
- ✓ Integrated with core banking systems for real-time financial data updates and designed a scalable solution to handle peak traffic during key financial events

Selection of Projects

- ✓ **HDFC Banking (Banking Domain)** – Designed and developed a comprehensive banking application for HDFC Bank using .NET Core, enhancing real-time transaction processing capabilities and ensuring seamless integration with existing banking infrastructure. Played a pivotal role in code optimization, reducing processing time for high-value transactions by 30% through efficient SQL query execution and asynchronous programming techniques. Participated in cloud deployment of the application using Azure, optimizing scalability and availability, handling over 1 million transactions per day
- ✓ **Boston Scientific AVS(IOT Application)**- – Developed an IoT-based product packaging scanner using .NET Core API and Angular, automating the process and ensuring real-time validation of packaging labels through RFID/barcode scanning. Successfully integrated a scalable IoT solution that improved packaging accuracy and efficiency by 30%. Ensured seamless real-time data synchronization between packaging devices and the cloud. Integrated RFID and barcode scanning devices with the application to capture product details, ensuring automated packaging processes. Implemented real-time data streaming between edge devices and cloud using MQTT and WebSockets, providing seamless and instant feedback to the packaging system
- ✓ **Certify Health(Health and Insurance Domain):** Healthcare Software products to manage the patient details like appointment and their history. Integrated Change Health API and Implemented Insurance Claim Eligibility in Certify Health for all Institutions. Entire Application is Deployed Into Cloud. To Assign and get Sign Off approval from QA Team then Move to Demo and Prod Environment.
- ✓ **Vega (Banking Domain):** Vega is a Customer relationship management software that has successfully integrated various modules. These include functionalities for quotations, surveys, service leads, payment transactions, and administrative tasks. The implementation of these modules enhances the software's capability to streamline operations and improve user experience. Each component is designed to facilitate efficient management of customer interactions and transactions. Data exchange between these two locations achieved through WCF web services with service contracts, MVC design pattern with J-Query, Telerik.
- ✓ **Solid Knowledge in Investment and Wealth Domain**

IT Certification

- ✓ **Dotnet Fullstack Course**
May, 2018 - May, 2019
Basant Technologies – Bangalore, India
- ✓ **Foundational C# with Microsoft**
July 2024
FreecodeCamp & Microsoft

Basant Technologies – Bangalore, India
- ✓ **Foundational C# with Microsoft**
July 2024
FreecodeCamp & Microsoft
- ✓ **Python Mega Course**

July, 2021 Udemy.

- ✓ **Android Development Quiz**
December, 2020 Itronix
Solutions, India.
- ✓ **C Tutorial Course**
September, 2019 Solo Learn
- ✓ **Certification in .Net Framework 3.5**
March, 2018 Brainbench - Online
test

Roles and responsibilities:

- ✓ Develop, test, and maintain RESTful APIs and microservices using ASP.NET Core.
- ✓ Work with Entity Framework Core for data access and ORM management.
- ✓ Optimize Performance and Security of the .NET Application
- ✓ Debug, Troubleshoot Backend Issues and Implement fixes efficiently
- ✓ Build and Maintain responsive and dynamic UIs using Angular and React
- ✓ Write Optimized **SQL Queries, Stored Procedures and Triggers**
- ✓ Integrating **Docker** and **Kubernetes** Clustering
- ✓ CI/CD Implementation using **Git, Azure, Jenkins**
- ✓ Manage Configuration Secret with **Azure KeyVault, AWS Secret Manager**
- ✓ Follow **Agile Methodologies** Participate in Sprint Planning, and Daily Standups
- ✓ Use **JIRA, Azure Borads** for Project Tracking and Task Management
